

# Vermont Fuel Price Report

June 2006

## One-Year Price Trend

## Vermont Average Retail Petroleum Prices (per gallon)

	June '06	May '06	%change	June '05	%change
No. 2 Fuel Oil	\$2.59	\$2.60	-0.64%	\$2.06	25.48%
Kerosene	\$2.90	\$2.92	-0.86%	\$2.31	25.43%
Propane	\$2.35	\$2.35	0.06%	\$1.96	19.56%
Reg. Unleaded Gasoline	\$2.82	\$2.93	-3.98%	\$2.12	33.12%
Diesel	\$3.00	\$3.00	-0.15%	\$2.38	26.15%

## Fuel Price Ranges in Vermont

## Gasoline and Diesel Prices

The Energy Information Administration (EIA) has reported that as of June 5th (which is when the VT fuel survey was conducted) the national average retail price of regular gasoline was \$2.89 per gallon, and the New England average price was \$2.97 per gallon. The national average retail price of diesel was \$2.89 and the New England average price was \$2.97 per gallon.

### Price Protection Programs

Many fuel dealers offer their customers "price protection" programs. With **"Pre-Buy"** programs customers can purchase a specified volume of fuel at a discounted price by paying for the heating season's fuel in advance. In **"Fixed Price"** programs, a pre-determined price per unit is set for all of the fuel delivered during the heating season. In **"Cap"** programs, the fuel price will not exceed a pre-determined value, and may go down based on market conditions at time of delivery. Cap and Fixed Price programs may be part of "Budget" programs in which the customer agrees to make equal monthly payments, often for 10 to 12 months.

Price protection programs are beneficial for several reasons. First, they provide a degree of certainty. Customers make commitments to local dealers, who make commitments to their suppliers, who make commitments to the refining industry. This chain of commitment reduces market volatility and increases the ability for market participants to efficiently schedule their resources. Secondly, customers are better able to budget their finances and thus are not caught short during the heating season. Lastly, price protection programs typically save customers money as the costs of buying fuel at the current or "spot" price can add up quickly. For example, the average price for heating oil **pre-buy** programs last summer was about \$2.16, and the average price for heating oil this past heating season (October-March) was \$2.48, so those that participated in programs most likely realized substantial savings. However, price protection programs don't guarantee savings so citizens need to consider their options carefully.

The charts below show the availability and price per gallon for price protection programs as of **June 5th**, from a representative sample (approximately 70) Vermont fuel dealers. Many dealers indicated that they were delaying offering their programs until July or August.

NOTE: The Vermont Fuel Price Report is published monthly by the Vermont Department of Public Service. Prices are collected on or about the first Monday of each month and reflect dealer discounts for cash or self-service, except propane prices, which are an average of the credit and discount price.
